Java Programming - Day wise Syllabus
Duration – 40 Hours

Topics:

1 Java Introduction

- Features of Java Programming
- Examples

2 OOPs with Java

- Fundamentals of Java
- Work with Commands

3 Creating classes

- objects, Data types
- Practice with Classes and Objects

4 Work with Arrays and Decision constructs

- Practice with Examples

5 String Handling

- Functions in String
- Example Programming

6 Class hierarchy and Inheritance
- Practice with Types of Inheritance

7 Polymorphism
- Overloading
- Overriding
- Programming with Examples

8 Abstract Classes with Examples

9 Interfaces explanation with Examples

10 Creating User interfaces using Controls

11 Java Swings

12 Layout Managers

13 Util packages – Introduction

Util Packages with example

15 Collections

16 Event Handling controls and Examples

17 Thread and Multithreading Introduction Examples

Multithreading Practice with Examples

19 Exception Handling with Types

Serialization
Deserialization in Java
Java Heap Memory
Stack Memory

20 Java Networking

Practice with Java Networking

21 I/O streams – Introduction

Practice with I/O Streams

22 Database Introduction

Database Management- Introduction
Practice with JDBC Examples

23 Internationalization

24 Java New Features

25 Mini Project with Explanation

26 Guidelines to Create a Project
